

Applications:

1. Antistatic coating
2. Catalysts
3. CRT display of color television and personal computer
4. Electrochromic mirrors
5. Electrooptic modulators
6. Flat-panel displays
7. Gas sensors
8. Heat shields
9. ITO ink
10. Low-emissivity windows
11. Organic light emitting diodes (OLED)
12. Photovoltaics
13. Radiation protection
14. Solar cells
15. Transparent electricity conductive glue
16. Transparent electrodes for display devices
17. Transparent coatings for solar energy heat mirrors
18. Windows films in n-p heterojunction solar cells
